Capability Statement

Business Summary

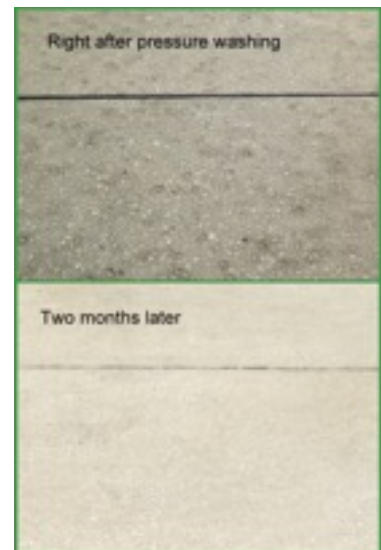

Mason Global LLC, an American wholesale company selling sustainability products for residential and commercial use. We can prevent and remove or fade existing organic contamination. Our products and services are safe, "Green" inexpensive and guaranteed satisfaction. Mason Global LLC has partnered with armONx, a manufacturer of a proprietary nano-technology called SelfClean.

SelfClean, as the name implies, effectively self-cleans surfaces like concrete, brick, pavers, travertine, natural stone, stucco, roof tiles, pool decks, patios and other cementitious surfaces.

SelfClean works without using any harsh chemicals, causing treated surfaces to become photoactive. By absorbing natural sunlight or ambient light, the surface continually breaks down and rids itself of oil, mold, mildew and other contaminants that stain it. And in most cases, SelfClean cleans surfaces entirely within weeks.

Unique Features

- Photoactive using ambient sunlight
- Prevents organic contamination
- No environmental "runoff"
- Sustainable for years after single application
- Green product proven safe for plants, pets and people
- No V.O.C's
- Simple application that only takes minutes to apply
- Sterilizes Surfaces
- Reduces pressure washing by years

Customers save thousands of dollars, reducing pressure washing for years. We provide product, labor and a 5 year guarantee that SelfClean saves time, energy and money.

Why Pressure Wash Year after Year?
